

Hands-On Cyber Security Training · Indore, India

// 18-MONTH FLAGSHIP PROGRAM

Certified Information Security Expert (CISE)

One guided program from systems fundamentals to advanced enterprise attacks — every Armour Infosec course, culminating in the CISE qualification.

12 COURSES · 191 MODULES · 4 TIERS · 18 MONTHS

// ABOUT ARMOUR INFOSEC

Built by Hackers, for Defenders

Armour Infosec is an offensive-security training & consulting firm in Indore. For 15+ years we've worked on the live edge of penetration testing — and we teach the exact tradecraft our consultants use to break enterprise networks for clients.

Every course is lab-first: you compromise real targets, escalate privileges, pivot through Active Directory and write the reports you deliver on the job. Online Live and On-Premise Classroom modes share one curriculum and one certification track.
